HINO-CONNECT

What is HINO-CONNECT

HINO-CONNECT is an exclusive cutting edge system that provides vehicle security system and enables various data recording with 24-hour call centre support.

This telematics system is deemed to support our professional customers in ways of improving fleet operational performance, protecting their business assets, and leading towards the rose of profitability.

8 Main Functions

Using a sophisticated on-board computer and web-based software platform, HINO-CONNECT collects and transmits driver and vehicle data. Accessible to online fleet tracking and information portal, you can retrieve the insightful report and analytic data to improve efficiency across your fleet.

Driving Behaviour

- Monitor and identify driver's driving behaviour
- Mechanism to reduce fuel and servicing cost
- Operate a safer and greener fleet
- Improve driver's driving behaviour

SOS

SOS Button

- Push the SOS button for immediate rescue
- In the cases if emergency even - accident or breakdown
- Instant notification to HINO-CONNECT 24-hour call centre
- Immediate action to arrange support

Track and Trace

- Track and trace your vehicle under 24-hour control
- Monitor vehicle location and movement
- Supervise vehicle status - speeding, idling, engine (on/off)
- Review journey history playback

Theft Monitoring & Recovery

- 24-hour monitoring against break-in scenarios
- Alarm alert will notify to HINO-CONNECT call centre
- Theft verification with customer
- Immediate assist on the vehicle recovery

Extra Features

- 7-inch touch screen display
- Radio with SD card slot and Bluetooth function
- Built-in USB port to charge phone or power up other USB devices

HINO-CONNECT

Hino Telematics System

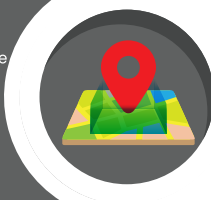

Service Maintenance Due Reminder

- Proactive support initiative by HINO
- Ensure the vehicle in perfect working condition
- Vehicle to stay on track for its service maintenance
- Improve efficiency across your fleet

Geo-Fencing

- Draw digital boundary to encircle area with date, time
- Pinpoint travelling location for each vehicle
- Monitor the vehicle movement and usage
- Ensure driver to follow the most efficient routes available

Fuel Consumption Monitoring

- Identify trends in fuel consumption for each vehicle
- Promote better fuel economy and efficiency
- Convince to improve the fleet performance
- Generate Fuel Consumption report
